The Program Educational Objectives (PEO) in Ba Statistics

[PEO-1]   :   Cultivate statisticians who demonstrate excellence, professionalism, strong ethical principles, and environmental awareness.

[PEO-2]   :   Establish the program as a premier center for statistical research, producing high-quality studies that address the needs of industry, economics, business, social and political sectors, health and environmental fields, and computational challenges related to tropical rainforest issues, while publishing findings nationally and internationally.

[PEO-3]   :   Apply statistical methods to address real-world societal challenges, including those connected to the tropical rainforest environment.

[PEO-4]   :   Forge collaborative, mutually beneficial relationships with other academic institutions, communities, and industries to advance and support the Ba Statistics.
